Town of Weston
c/o Tom Landry
Town Administrator
P.O. Box 1007
Weston, CT 06883

Dear Mr. Landry:

I am writing to inform you of a United States Environmental Protection Agency (EPA) Region 1 decision regarding the Town of Weston Landfill site located at 237 Godfrey Road in Weston, Connecticut (EPA Identification Number CTD980521090). The EPA Superfund program has determined that this site is not an appropriate candidate for further federal remedial action pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

The Town of Weston Landfill site has been reviewed by the Superfund Site Assessment program and EPA has concluded that, based upon currently available information this site will be archived from the Superfund Enterprise Management System (SEMS). This action is intended to underscore EPA's finding that the property is not a candidate for inclusion on the National Priorities List (NPL or "Superfund List"), and that EPA does not anticipate taking any further action at this site. This decision does not necessarily mean that there is no potential contamination associated with this site. EPA archive decisions are for federal actions only and do not absolve the property owner of any responsibilities or liabilities that may be required by the State of Connecticut. However, the decision to archive this site does mean that it is not judged to be a candidate for NPL consideration, and that EPA considers the Connecticut Department of Energy and Environmental Protection (CTDEEP) to be the lead agency should further investigation and remediation be warranted under Connecticut statutes/regulations. You may contact Patricia DeRosa of CT DEEP to verify the state program status of this property at (860)424-3501.

Finally, archive decisions may be changed in consultation with the state, based upon new information or substantially altered site conditions. Such significantly changed circumstances could result in a recommendation for further EPA involvement and potential inclusion on the NPL at a later time. In such an instance, the property owner would be notified and the site would be returned to the SEMS database.

If you have any questions regarding this decision, I may be reached at (617)918-1397.

Sincerely,

Meghan P. Cassidy, Chief
Technical & Enforcement Support Section
Office of Site Remediation & Restoration

February 18, 2015

Mr. Patrick Bowe
Director
Remediation Division, 2nd Floor
Department of Energy & Environmental Protection
79 Elm Street
Harford, CT 06106

Dear Mr. Bowe:

I am writing to inform the Connecticut Department of Energy and Environmental Protection (CT DEEP) that the Environmental Protection Agency (EPA) intends to archive the Town of Weston Landfill site located at 237 Godfrey Road, Weston, Connecticut, 06883 (EPA Identification Number CTD980521090) from the Superfund Enterprise Management System (SEMS). The EPA Superfund program is taking this action based on a determination that the site is not a likely candidate for further federal remedial action and inclusion on the National Priorities List (NPL) pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

The site in question has previously been reviewed by the EPA Superfund Site Assessment program and EPA has concluded that, based on currently available information the site will be archived from SEMS. This action is intended to underscore EPA's finding that the property is not a candidate for inclusion on the NPL, and that EPA does not anticipate taking any further action at the site. Sites are generally included on the NPL based on a request from, and concurrence by, the state where the site is located. As you know, EPA archive decisions are for federal actions only and do not absolve the property owners of any responsibilities that may be required by the State of Connecticut. However, the decision to archive this site does mean that the site is judged not to be a candidate for NPL consideration, and that EPA considers CT DEEP to be the lead agency should further investigation and remediation be warranted under Connecticut statutes/regulations.

Finally, archive decisions may be changed in consultation with the state, based upon new information or substantially altered site conditions. Such significantly changed circumstances could result in a recommendation for further EPA involvement and potential inclusion on the NPL at a later time.

Once the site is archived, EPA will send a letter explaining the archive action to the property owner on record.

EPA intends to archive the site thirty (30) days from the date of this letter. Should CT DEEP object to this archive action, please notify Meghan Cassidy at cassidy.meghan@epa.gov. Should you have any additional questions regarding this matter, please contact me at (617)918-1401 or Meghan Cassidy at (617)918-1387.

Sincerely,

Stanley D. Chin, Chief
Technical and Support Branch
Office of Site Remediation and Restoration
